USE & FEATURES

USE:

All types of of Masala, Ayurvedic Herbs, Dry leaves, Fruit dried pulp etc.

FEATURES

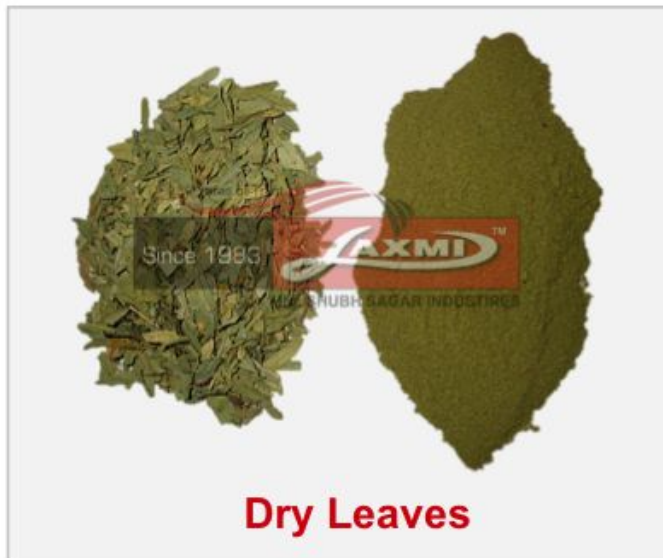

1. Easy to operate
2. High speed grinding technology
3. Low friction cutting grinding technology
4. 3 filter screen set
5. Heavy duty machine
6. High quality electric motor
7. Heavy duty grinding chamber
8. Fine grinding
9. Maintenance free
10. No wastage after grinding

OPERATING INSTRUCTIONS

1. First of all, set the filter net as per your grinding requirement then close the grinding chamber.
2. Please use the cloth at the outlet to collect grinding material.
3. Also cover the top side of the outlet by cloth for air circulation.
4. Turn the main switch and turn ON the MCB switch.
5. Please fill the hopper by grinding material.
6. Lift the hopper window upside so material can go inside the grinding chamber from hopper.
7. Once the material will finish from the hopper then wait for few minutes cause some material left in grinding chamber to grind. Clean the grinding chamber before you grind another material.
8. Once you done with grinding, clean the grinding chamber and filters properly by brush.

NOTE: For any reason, If the machine will stop suddenly during grinding means material overloaded in grinding chamber so clean it out and start again.
